

Welcome to AP Computer Science A!

TO DO:

- 1- Join the APCS A Google Classroom. Code: **4kcydki**
- 2- Join the CodeHS Classroom using the link on Google Classroom.
- 3- Complete all assignments in Unit 0: Java Pretests and Unit 1: Primitive Types. The only assignment you will not be able to access is the unit assessment.

Important Info:

- Each Quiz, Exercise, and Challenge will be counted toward the grade for this summer assignment.
- Each task has a different number of points based on its difficulty, so be cognizant of this while you are working.
- The entire unit counts as a 50p homework grade and is due Aug 15.
- There will be a multiple choice unit test on the third day of school. We will use the first two days of class to troubleshoot any issues with your code from the summer assignment.

Tips for success:

- ★ **BE COGNIZANT OF THE DIFFICULTY WHILE WORKING...**
 - If you can get ahead on some easy lessons, you will have more time for the difficult lessons.
 - Don't be afraid to email me!
- ★ **YOU WILL GET STUCK AND FRUSTRATED...**
 - Don't be afraid to walk away and come back to your code. However, if you don't revisit it quickly, you will forget what you did and have to restart from scratch!
 - Comment your code if you are going to walk away from it...
 - Describe what each piece of your code does so you can come back to it without having to spend time figuring it out.
- ★ **SOMETIMES IT'S NOT THE TECH, IT'S YOUR CODE...**
 - If the site crashes when you run your code, it's likely you have an infinite loop in your code.
 - Close the window, open it back up again, and find the loop and get rid of it before you run the code again.

I am here to help... please email me if you need help with anything!
